Description

The Payliance payment form provides merchants the ability to accept consumer initiated payments in real time via a secure web page without any development effort.

Merchant can allow a convenience fee to be added based on their configuration at the time of set up. This fee is automatically added and displayed if enabled.

Calling the form

To call the payment form from your website simply replace the sample MerchantId with your own.

* Note if you don't know your MerchantId ask the implementations team for help.

Sample Code (HTML)

```
<a href="https://cardproxy.payliance.com/payment/default?merchantId=00000000-0000-0000-0000-000000000000"></a>
```

I'm not a robot  [Privacy](#) - [Terms](#)

By clicking the "Pay" button, I authorize the Biller to debit the Bank Account or Credit Card indicated, for the noted amount on today's date. I understand that returns, refunds and cancellations are not permitted, however exceptions may be made on a case-by-case basis. I understand that because this is an electronic transaction, these funds may be withdrawn from my account immediately. I certify that I am an authorized user of this credit card or bank account, and that I will not dispute the payment with my Credit Card Company or Bank, so long as the transaction corresponds to the terms indicated in this web form.

You can also pass in cardId, which will give you a different view with just the CVV field that will use the cardId for Tokenized payment requests. The postform will have the capability to skip the doSubmit/tokenize and move immediately to the payment when the cardId is present.

```
<a href="https://cardproxy.payliance.com/payment/default?merchantId=00000000-0000-0000-0000-000000000000&cardId=00000000-0000-0000-0000-000000000000"></a>
```

Screenshot

Customizing the form

To customize the prompt displayed for the Memo field simply add the optional "memo" parameter, this will also make entering it required.

* Note the value must be URL encoded.

Sample Code (HTML)

```
<a href="https://cardproxy.payliance.com/payment/default?merchantId=00000000-0000-0000-0000-000000000000&memo=Please%20enter%20your%20customer%20number"></a>
```
